

Alternative Energy Brochure

In a group of two you will create a fictional electrical energy supply company. Your company can exist anywhere in the United States. Your company may use alternative energies or conventional methods for creating electricity. You are to make a colorful pamphlet about your company. The pamphlet needs to include the following:

- 1) A company name and logo
- 2) A description of how the electricity will be produced using an existing energy technology.
You may give consumers choices as to the source.
- 3) Research and cost estimates per kilowatt hour. The cost could determine consumer choices.
- 4) At least 10 statements describing why people should use your company.
The statements can be in paragraph and/or bullet format.
Your statements should include its advantages over fossil fuels.
- 5) You must give a detailed explanation of how your technology works.
- 6) Pictures, drawing, and a colorful pamphlet.
