

Cats Parachuted into Borneo

“Back in the 1950’s thousands of people in Borneo were dying of malaria. The World Health Organization (WHO) wanted to help. What happened?”

1. You will work with a partner on this one.
2. You will need a pair of scissors
3. Cut out up the cards.
4. Arrange the cards in sequential order of what happened in Borneo on the paper.
5. Bring the correctly arranged cards to me so I can check. *You only get three tries!*
6. The first two groups to complete this will receive extra credit/tardy passes, the next two will receive candy.
7. Once your cards are in order Tape/Glue them down.

<p>Rats brought the plague & typhus</p> 	<p>Mosquitoes carry the malaria protozoa</p> 	<p>The cats died</p> 	<p>The caterpillar population increased</p> 	<p>The WHO sent DDT to Borneo</p> 
<p>The mosquitoes were eradicated</p> 	<p>The caterpillars ate the grass roofs of people's huts</p> 	<p>14,000 living cats were parachuted into Borneo</p> 	<p>The cats ate the geckoes which contained DDT</p> 	<p>Malaria kills thousands of people in Borneo</p> 
<p>The geckoes ate DDT-enriched insects</p> 	<p>Thatched roofs collapsed on people's heads.</p> 	<p>The incidence of malaria decreased</p> 	<p>DDT killed the parasitic wasp population.</p> 	<p>The rat population increased</p>
