Chapter 1 The Science of Biology

Section 1–1 What Is Science? (pages 3–7)

This section explains what the goal of science is and describes a scientific view of the world.

What Science Is and Is Not (page 3)

1. What is the goal of science? ______

2. What is science?

Thinking Like a Scientist (page 4)

3. What is observation? _____

4. The information gathered from observation is called ______.

5. Complete the table about types of data.

TYPES OF DATA

Туре	Data Involves	Example
	Numbers	
	Characteristics that cannot be easily measured or counted

6. What is an inference?

Explaining and Interpreting Evidence (page 5)

7. What is a hypothesis? _____

- 8. In science, a hypothesis is useful only if it can be _____
- 9. Is the following sentence true or false? A hypothesis should be stated in such a way that it can never be proved wrong.
- **10.** What are three ways from which hypotheses may arise?
 - a. _____ b. _____
 - c.
- **11.** Circle the letter of each of the following that may be an outcome of testing a hypothesis.
 - **a.** The hypothesis is partly true but needs to be revised.
 - **b.** The hypothesis is wrong.
 - **c.** The hypothesis is supported.
 - **d.** The hypothesis is of no value.

Science as a Way of Knowing (page 6)

12. What do scientists assume about the universe?

13. What are some qualities that are desirable in a scientist? _____

Science and Human Values (page 7)

14. Is the following sentence true or false? A community must use its shared values to make decisions about scientific issues.
