

1. What countries are these large game animals native to?
2. Describe how these species are exotic but not invasive.
3. Describe the incentive that ranchers have to keep these animals on their ranches.
4. Explain why you agree or disagree with the statement “Hunters are conservationists?”
5. In captive breeding programs of endangered species or species that are extinct in the wild the goal is to breed individuals from separate populations found in different locations. Why would that be important for the future survival of the species?
6. The two sides of this issue are the Exotic Wildlife Association (hunters) and the Friends of Wildlife. Which side do you agree with? Justify your answer.
