

1. Compare and contrast the structure of tRNA and mRNA.

---

---

---

2. What is the function of tRNA?

---

---

3. What is an anticodon?

---

---

---

4. Which mRNA codon usually signals the beginning of protein synthesis?

---

---

5. How are amino acids joined together to form a protein?

---

---

---

6. Which anticodon bonds with the mRNA codon CCA? Which amino acid does this tRNA carry?

---

---

---

7. What is the function of a stop codon?

---

---

---
